## Information Security [INFOSEC] Briefing

---

### [June - 2023 Cybersecurity Focus](#)

Buckle up; it's going to be a fast ride!

Proceed with caution and consider the unintended consequences.

- Be kind to the environment. With increased data usage also comes an increased carbon footprint.
- Exercise caution when using AI systems.
- Do not rely on AI to be accurate

unintended consequences

Happy Summer, and wishing you a joyous 4<sup>th</sup> of July!

---

*Don't take the bait! IT will never ask you for your username and password via email.  
Phishing e-mails attempt to deceive you into giving up private information in a response  
to a message or by leading you to a fraudulent web site.*

*For more tips about phishing, go to [\\_\\_\\_\\_\\_](#)*
